Third-Party Transceiver Compatibility Note: Customers are advised that the Pluribus Netvisor ONE OS does not lock transceiver support, however due to potential variations of the firmware and implementations within physical transceivers, not all third-party transceivers will be fully compatible off-the-shelf. Pluribus Networks has endeavored to test and validate third-party transceivers and those listed here are based upon the manufacturers currently shipping versions at the time of testing. Pluribus advises that transceiver models substituted by the manufacture or from a third-party manufacturer, although claimed to be functionally equivalent, may not be compatible. The customers is advised to contact Pluribus Networks to verify compatibility and validate interoperability prior to purchasing or deployment.
